

HOW TO BECOME AN APPROVED CNA-DT TRAINING PROGRAM

Dialysis Centers who are licensed by the State of Maryland are eligible to be approved to teach the CNA DT Program. The Dialysis Center must meet the requirements for Nursing Assistant Training Program Regulations COMAR 10.39.02 and teach the Board approved uniform CNA-DT Training Program. Training programs will be surveyed periodically by the Board of Nursing and must submit their program for Board approval every two years. The training program, curriculum and application can be obtained from the Board's Acting Director of Licensing and Certification, Shirley Devaris, JD, RN, by email at Shirley.devaris@maryland.gov
